ENVIRONMENTAL POLICY STATEMENT

Our Aim
Mettex is committed to minimising the impact of its manufacturing processes on the environment and to continuously seeking improvements.

The key points in our strategy to achieve this are as follows:

- Promoting energy conservation
- Promoting careful avoidance of waste by evaluating operations and ensuring they are as efficient as possible
- Actively promoting recycling both internally and amongst customers and suppliers by utilising re-cycled materials and re-usable packaging where possible
- Meeting and exceeding all environmental legislation with regards to toxic emissions and pollution
- Creating an Environmental Management System accredited to BS EN ISO 14001.

This Policy will be communicated to all staff and reviewed at regular intervals and will also be available to the general public on our company website, www.mettex.com

Signed: 
Keith Ridley
Director

REACH STATEMENT

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Mettex Electric Co Ltd confirms that all products supplied by us fulfil the requirements stipulated in regulation (EC) 1907/2006 of the European parliament concerning (REACH).

As of the next amendment (EU 2015/963 in July 2016), we understand from our suppliers that the products supplied to us do not contain substances of very high concern and do not foresee any problems in the continuing supply of these products.

If pre-registration of a substance is required, we have further been assured that of pre-registration documents will be forwarded to us, in which case we will present these on request.

The Quality Manager is responsible for REACH related matters at Mettex.

Signed: 
Keith Ridley
Director

RoHS & WEEE STATEMENT

European Directives regarding the Restriction of Use of Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE)

With reference to compliance to the recent RoHS Directive 2011/65/EU, all copper products supplied by Mettex are compliant with new regulations. Although copper contains very low levels of both lead and cadmium, these are naturally occurring elements and are not added to the products intentionally. Please see the data sheet below for copper coil used in the manufacture of copper wire purchased by Mettex.

Table of chemical analysis for copper (taken from BS EN 13779)

HEALTH & SAFETY POLICY STATEMENT

Mettex Electric acknowledges its legal and moral responsibilities for ensuring the safety, health and welfare of its employees and any other persons whose health and safety may be affected by the Company's activities.

The Company recognises that having an effective policy in place which clearly identifies the Company's organisation and arrangements is essential to successful health and safety management.

A primary element of the policy is to prevent, so far as is reasonably practicable, injury or ill health, both to employees and other persons who may be affected by the activities of the Company.

The Company will strive to effectively communicate the policy and ensure that employees, and others who may be working on, using or visiting Company premises, fully understand the requirement on their part in carrying out the policy and that their activity is undertaken in a manner which does not expose themselves or others to risk.

Health and safety performance will be monitored as an agenda point at business meetings.

Adequate financial, human and other resources will be made available to ensure the effective implementation of the policy.

The provision of training for employees and the appropriate financial resource is an integral part of the policy.

The Company meets its requirement to appoint a *Competent Person* who will provide advice on safety matters and general health and safety assistance by the engagement of external competency.

The requirement to communicate to and consult with employees is provided for by involvement of the workforce through shop floor meetings and the effective dissemination of information relating to healthy, safety and welfare matters.

The Company actively encourages participation in matters relating to health and safety. This includes ensuring an appropriate means for the reporting of safety and welfare issues by staff and suitable arrangements for joint consultation.

Appropriate action shall be taken should there be any breaches of established Health and Safety regulations or rules by any person(s).

The policy and its arrangements will be subject to monitoring and measurement in a structured, scheduled manner to determine performance against stated aims and objectives.

In addition to being reviewed by the senior management of the Company on an annual basis, the policy will be subject to continuous assessment, and as such will be amended should legislation, significant changes to working practices or new hazards necessitate this.

Signed: 

Keith Ridley
Director

CORPORATE RESPONSIBILITY

The Mettex policy on Corporate Responsibility reflects a commitment to protecting future generations by acting responsibly with respect to the environment, sustainable development of the business and society. This policy is adopted throughout our business operations and across the supply chain which we believe is essential in developing business partnerships only with companies who share this goal of ecological, social and economic improvements for all.

This policy requires all suppliers of Mettex to submit self-assessment Code of Conduct responses and these must conform to the minimum requirements on both financial and non-financial factors to ensure future development of the business relationship, or risk removal from our approved supplier database. We believe this will protect us from any potential risk to our reputation and business and is essential to long term growth.
